

## Workshop on Breast Cancer Awareness

**The** scientific field of MaXIMA has an important social impact and dissemination events aim to raise the public awareness related to prevention of breast cancer. During the organized Workshop on Breast Cancer Awareness invited speakers from the Medical University Hospital “St. Marina” in Varna presented important aspects of the breast cancer diagnosis and treatment.

## Training School on Advanced 3D Imaging for Biology Samples

**MaXIMA** action organized the 1<sup>st</sup> Training School entitled “Advanced 3D Imaging for biology samples”. Taking into account the rapid advances of technological developments and their leading role in modern medicine, the Training School aimed at developing knowledge and hands-on training of the local researchers for using micro CT from biology samples and related image processing techniques. Lectures were given by Prof. Paolo Russo from the University of Naples – Federico II.

## Special Session on eHealth and Networking for Advanced Cancer Detection

**MaXIMA** organized a Special Session – “eHealth and Networking for Advanced Cancer Detection”, as a part of the IEEE Black Sea Conference 2016. The session aimed to bring together researchers working in the field of biomedical image processing, computational modelling and simulations, bioinstrumentation and medical imaging technologies for advanced cancer detection.
